The following women are recorded among others as nursing two children: Mary McM., on nutrolactis six weeks. Frances McM., aged eight months, her own child, during the above time gained twelve ounces. John S., (nurse child), aged eight months, gained two pounds twelve ounces. Mary D., on nutrolactis eight weeks. John D., aged ten months, her own child, gained one pound eight ounces. Howard B., aged six months (nurse child), gained one pound and a half. We have had several women whose supply of milk was insufficient, but after taking nutrolactis they have been able to nurse two children. The women who take it all say that it positively adds to their flow of milk. As it is not particularly agreeable to take, containing little alcohol, I believe that their praise of it is not due to bias on account of palatability, and...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
