

## Artificial Neural Networks in Medicine and Biology

By Malmgren, H. / Borga, Magnus

Book Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the ANNIMAB-1 Conference, Göteborg, Sweden, 13-16 May 2000 | This book contains the proceedings of the conference ANNIMAB-I, held 13-16 May 2000 in Goteborg, Sweden. The conference was organized by the Society for Artificial Neural Networks in Medicine and Biology (ANNIMAB-S), which was established to promote research within a new and genuinely cross-disciplinary field. Forty-two contributions were accepted for presentation; in addition to these, S invited papers are also included. Research within medicine and biology has often been characterised by application of statistical methods for evaluating domain specific data. The growing interest in Artificial Neural Networks has not only introduced new methods for data analysis, but also opened up for development of new models of biological and ecological systems. The ANNIMAB-I conference is focusing on some of the many uses of artificial neural networks with relevance for medicine and biology, specifically: - Medical applications of artificial neural networks: for better diagnoses and outcome predictions from clinical and laboratory data, in the processing of ECG and EEG signals, in medical image analysis, etc. More than half of the contributions address such clinically oriented issues. - Uses of ANNs in biology outside clinical...

### Reviews

*I just began looking over this pdf. It is one of the most amazing pdf i have study. I discovered this book from my dad and i recommended this pdf to understand.*

-- **Merritt Kilback II**

*Good e book and useful one. I have got read and that i am confident that i will likely to go through once more again later on. It is extremely difficult to leave it before concluding, once you begin to read the book.*
